Approved For Release 2001/07/12 : CIA-RDP84-00933R000400160023-8

1 December 1977

MEMORANDUM FOR: Director, ODP

STATINTL

FROM

Acting Deputy Director for Processing

SUBJECT

: Processing Weekly Report

Tasks Accomplished

1. Version 4.1 of Fast Dump Restore has been installed on the CAMS systems in both the Special Center and the Center. Considerable testing has been conducted by SPD to ensure reliability of this version. No problems were found during testing and, as a result, the use of IEHDASDR to back STATINTL up CAMS has been discontinued.

STATINTL

- 2. A summary of outstanding RAMIS problems has been sent to STATINTL
- 3. The CAMS data base was reallocated and redistributed during the weekend of 26-27 November. The redistribution should reduce disk arm contention. However, it has been noticed that while online responses are better there is a noticeably slower turnaround of batch jobs. The CAMS system was in a read-only mode for 20 hours and unavailable for an additional 30 hours while the reallocation and redistribution was accomplished.

STATINTL

- 4. All final Directorate Congressional Budget reports (except for the DDO) were completed and ready for Xeroxing by 0800 28 November. The final reports for the DDO will be STATINTL completed by 2 December.
- 5. Sixteen programs have been converted from EAM processing to the 370/20 using RPG programming. This conversion has significantly decreased required production time and improved reports distribution to users.
- 6. Processing of the CFC data has been accomplished through day 23 of the 1977 campaign. All data is expected to be received and processed within the next two weeks.

7. The Office of Finance sent a memorandum to ODP commending the following people for their contribution to the year-end GAS processing:

STATINTL

STATINTL

STATINTL

8. There were seventeen new users added to the VM system during the past week. There are now 2,158 VM system users.

Problems

STATINTL STATINTL

Hardware problems are still being encountered with the PDP-11/45. It is attempting to resolve these problems.

Addendum

STATINTL

On 30 November and 1 December we experienced problems on both the primary and the backup PDP computers which support MAD processing. The OCR COLTS and OLTA systems capability were deleteriously impacted by these problems. Engineers are now devoting increased time and attention to our problems.
